- Head of CRO for INSPIRE BRANDS DIGITAL
- Running We Convert since 2019
- **Certified conversion optimizer, growth hacker, data analyst, behavioral designer**

the oodie golí NUTRITION spacegoods MOON MAGIC CRAFTD

Executive Summary

What we did:
Our CRO research framework is a comprehensive research framework that provides a good balance between agility and thoroughness. It includes a multitude of qualitative and quantitative analysis methods to extract the most value out of all data sources. In this case the research methods used were: UX heuristic analysis, Google Analytics audit, heatmaps, exit polls, user testing, and customer surveys.

What we found:
Our research has resulted in74 recommendations for improved user experience and conversion rate. These opportunities centre around the following problem statements:

- Category Navigation: Users find it difficult to navigation to a relevant product category
- Information Gathering: Users struggled to determine which products is best for them
- Delivery & Returns: Users have uncertainties around the delivery & returns process
- Checkout: There is opportunity to streamline the checkout process.

Next Steps:
After presenting the key insights from each activity and the top priority recommendations we'll transfer everything into a prioritised database using our PX prioritisation model. This will inform development of a roadmap of ongoing optimization activity to support you in achieving your goals.

Meeting objectives

The goal of today's meeting is to find out more about Nominal's conversion issues and agree on the testing roadmap.

To achieve this goal, we will answer the following questions:

Funnel issues

- **Where** are we losing the most money?
- **Why** are visitors dropping off?
- What can we do **to fix** those problems?

Testing roadmap

- **How** to fix the issues? List of prioritised issues and experiment ideas
- What is the **additional revenue** estimated by fixing the issues?
- What are the **next steps** and how long will it take?

Let’s take a look at Google Analytics data

Apr 4hth - July 4th 2025, Own analysis

WeConvert
CRO AGENCY

Your average CVR is slightly higher than the median of similar stores and even surpasses the top 25%. Moving forward, we'll explore ways to improve it even further

Your AVG CVR
2.39%
Your store's current performance

Median CVR
1.41%
Peer benchmark—an industry-wide average

Top 25%
>2.09%
Top performance within your niche

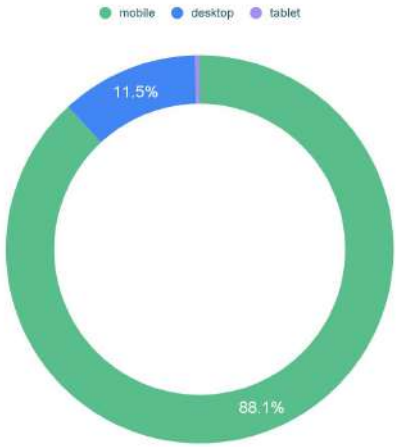
Nominal's average conversion rate (2.39%) is above the industry median (1.44%) and even surpasses the top 25% of stores, which typically achieve rates above 2.09%. This reflects strong performance driven by effective promotional strategies and customer interest.

In the following slides, we've outlined clear strategies and actionable insights focused on key optimization areas. By implementing these recommendations and maintaining consistent testing, we believe Nominal can further improve and reach top-performing benchmarks.

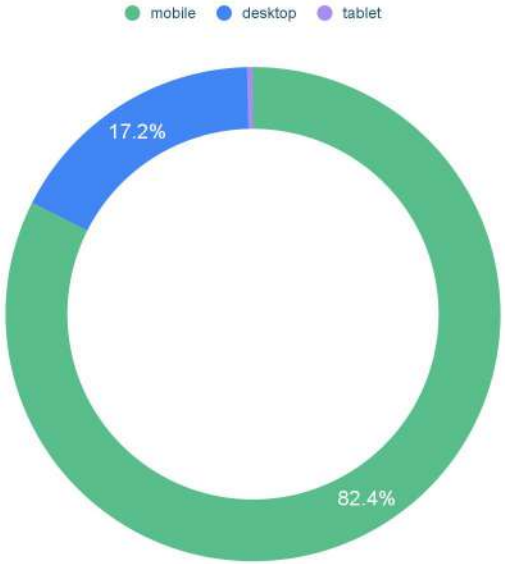
Source: Shopify Analytics from Apr 4hth - July 4th 2025, Own analysis

WeConvert CRO/AGENCY

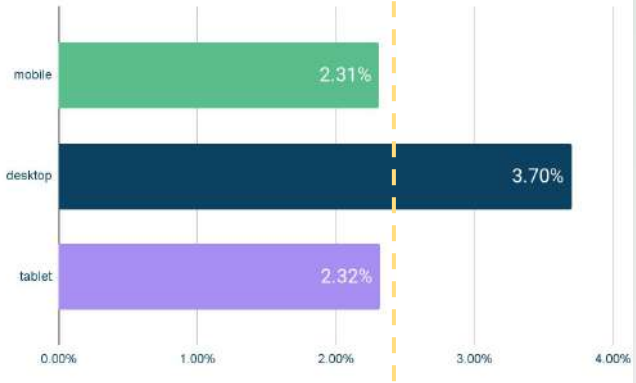
Desktop CVR is expected to be around 64% higher than mobile, but this large discrepancy may have been influenced by the low traffic share (11%).



Sessions share by Device Type



Transactions by Device Type



E-commerce conversion rate

But the question is, how do we get there?

Meet our very own CRO4 framework

A proven framework for identifying and solving e-comm conversion problems.

- What actions can solve the issues we discovered?
- What strategies can boost conversions and KPIs?
- What measures can we take to fix the drop-offs?

- User motivations
- Hesitations & doubts
- Lack of trust or clarity

- Drop-offs & friction points
- Low conversion rates
- Slow loading times
- Low engagement times & High bounce rates

- Who are people visiting your website?
- Where they are coming from?
- What problems they are trying to solve?

By answering each layer, we uncover what's holding your store back — and how to fix it.

WeConvert CRO/AGENCY

FIRST LET'S TRY TO UNDERSTAND YOUR BUYERS

Knowing your audience

Answering the questions

Who are the PEOPLE visiting Nominal?

Where are they coming from?

How do they contribute to your bottom line?

The majority of your audience is aged 25–44, with females making up 67% of visitors according to Google Analytics

NOW LET'S FIND OUT

Where are your visitors dropping off?

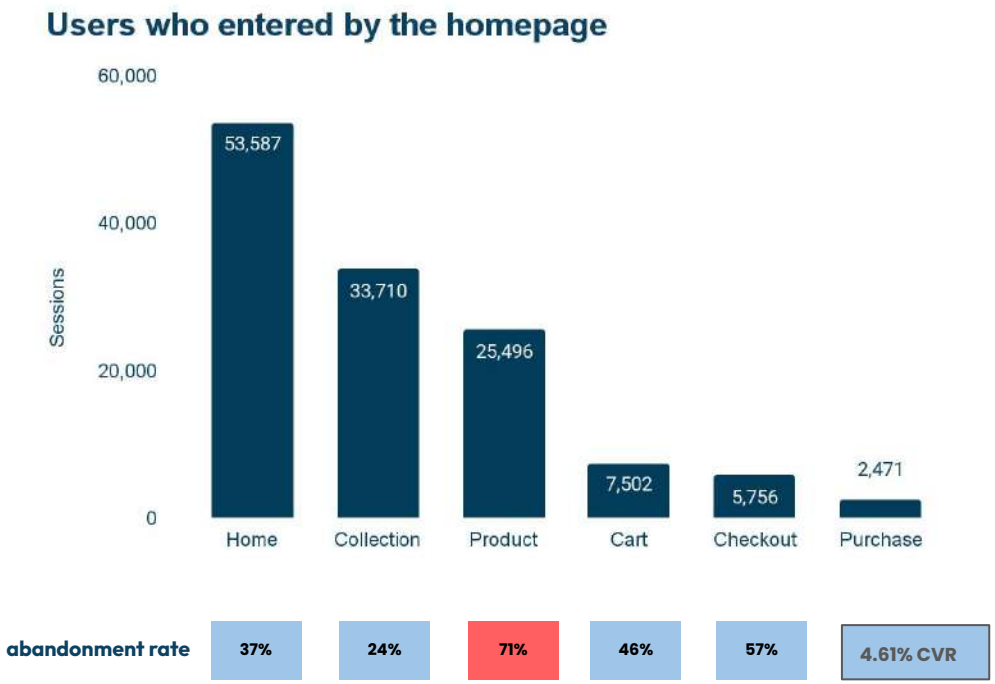
Apr 4hth - July 4th 2025, Own analysis

WeConvert
CRO/AGENCY

The drop-off for users who enter through the homepage is collection pages with 24% proceed to the product



Users who entered through the homepage had the highest final conversion rate -73% higher than those who started their sessions on collection or product pages. This suggests that the homepage funnel is more effective, helping users choose the right product and continue through the journey, even with more steps involved.

Considering the homepage is where we explain our benefits, values, brand story, and other key messaging, this outcome is justified.

We observed a significant drop-off from the product page, with only 29% of users proceeding. On the other hand, the CVR from other steps are well above average.

Notably, the checkout conversion rate stands at 57%, indicating that users who start from the homepage are more likely to select the right product and complete their purchase.

Source: GA Analytics from April 4- May 31 2025

WeConvert
CRO/AGENCY

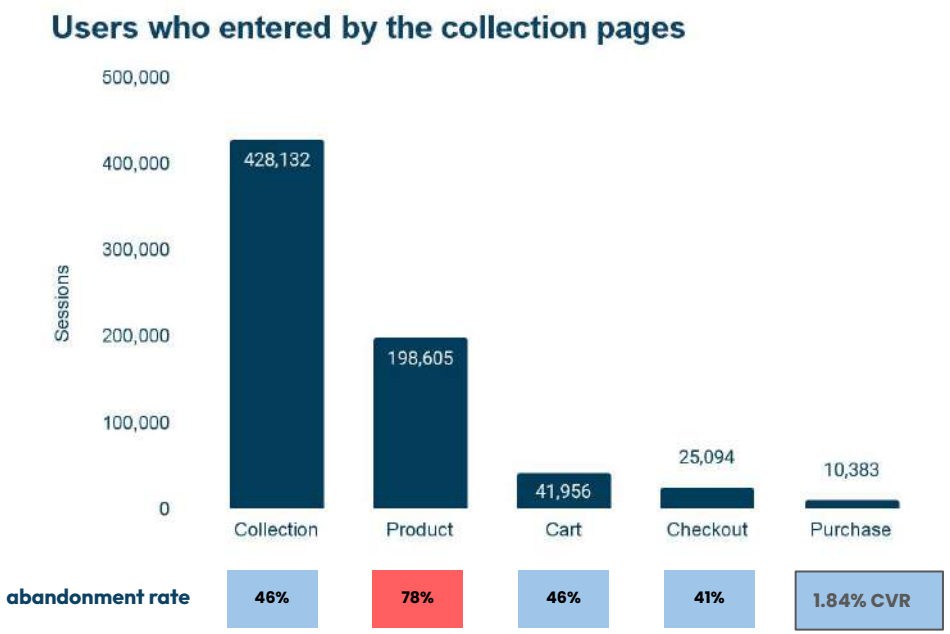
The drop-off for users who enter through the collection is product pages with 28% proceed to the cart



When analyzing users who entered through the collection pages, we observed a significant drop-off between the product page and the cart. Users are typically selecting and filtering products on the collection page, but many are not converting from there.

This may indicate that users are unsure about which product to choose or don't feel incentivized enough to proceed.

We can **focus on improving the product page** to help users feel more inclined to continue—by reinforcing key benefits, addressing doubts, and suggesting alternative product options if they're not fully convinced.

The other stages show average or stable conversion rates.

Source: GA Analytics from April 4- May 31 2025

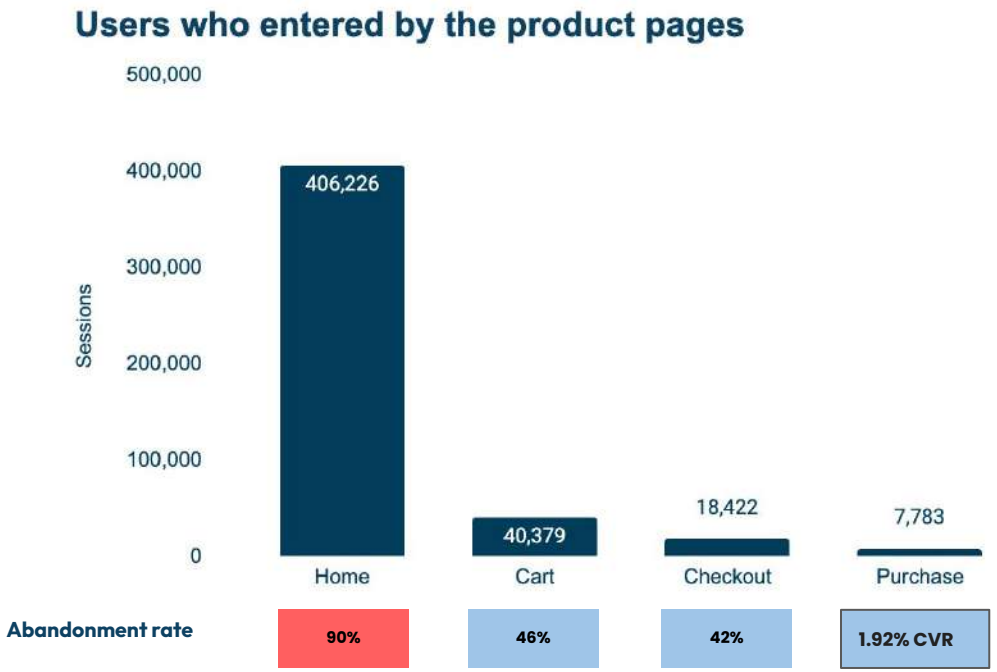
Source: GA Analytics from April 4- May 31 2025

WeConvert CRO/AGENCY

The main drop-off for users who enter through the product pages occurs at the add-to-cart rate, with an 90% abandonment rate



For users who entered through product pages, we observed a **high abandonment rate at the product view stage, with nearly 90% dropping off.**

Our main focus here should be to provide more persuasive information on the product page to encourage users to move forward and add items to their cart.

Improving the product page experience is crucial not only for this specific entry point but also for strengthening other user journeys throughout the funnel.

Source: Shopify Analytics from Apr 4hth - July 4th 2025, Own analysis

Collection	374,816	29.9%	44.9%	2.5 min
Product	472,874	37.7%	62.16%	1.8 mins

We observed a high number of users reaching the product page, but most are exiting the website from there and spending less time compared to other page types

Source: GA Analytics from April 4- May 31 2025

Earrings have strong potential to generate more revenue. We should focus on attracting more users to this category and implement strategies to increase its average order value

Product Category	Revenue	% Revenue	% Users	A2C	Checkout	CVR	AOV	RPU
Women's Necklaces	$605,936.41	39.6%	37.2%	26.15%	55.73%	5.47%	$48.00	$2.62
Women's Rings	$314,634.28	20.6%	20.6%	30.32%	51.65%	6.75%	$36.46	$2.46
Women's Bracelets	$181,698.13	11.9%	13.5%	24.24%	58.81%	5.30%	$40.91	$2.17
Women's Earrings	$109,702.14	7.2%	5.8%	34.12%	51.13%	8.69%	$35.35	$3.07
Men's Necklaces	$62,742.20	4.1%	5.0%	19.43%	69.23%	5.30%	$38.52	$2.04
Men's Rings	$43,359.45	2.8%	4.0%	15.84%	75.45%	4.40%	$39.93	$1.76
Men's Bracelets	$33,477.26	2.2%	2.4%	21.87%	79.79%	5.96%	$37.32	$2.22
Women's Anklets	$29,790.95	2.0%	2.0%	30.61%	55.19%	6.97%	$34.97	$2.44
Watches	$40,137.67	2.6%	1.3%	14.60%	71.92%	3.66%	$131.60	$4.81

The men's product category has a significantly higher conversion rate at the checkout stage compared to the women's categories. Furthermore, we observed that earrings generate higher revenue per user, despite having one of the lowest average order values compared to other categories. This suggests we can focus on attracting a higher volume of users to this category to maximize overall revenue.

Source: GA Analytics from April 4- May 31 2025

Replicate SMS performance in email marketing and promote higher-value products. Another focus should be increasing engagement and AOV in the paid social channel

Channel	%	Bounce	Session Dur.	%	eCVR	RPV	AoV
Paid Social	36.1%	2.85%	1m 19s	12.1%	0.53%	$0.40	$76.63
Direct	18.2%	6.42%	2m 54s	38.1%	2.86%	$2.51	$87.57
Organic Social	10.9%	2.14%	1m 51s	5.0%	0.66%	$0.55	$82.62
Email	7.0%	6.74%	2m 50s	6.4%	1.33%	$1.10	$83.28
Cross-network	6.5%	6.83%	3m 51s	10.1%	2.41%	$1.87	$77.62
Organic Search	6.4%	9.76%	4m 18s	9.6%	2.03%	$1.81	$89.46
SMS	5.6%	6.41%	2m 46s	6.0%	1.50%	$1.29	$86.32
Paid Search	4.2%	7.90%	4m 28s	7.3%	2.48%	$2.10	$84.46

Source: GA Analytics from April 4- May 31 2025

Search channels show higher session durations, with paid search delivering the highest revenue per visitor. These channels present a strong opportunity for further investment to attract more qualified traffic.

SMS outperforms email marketing, suggesting we should analyze the SMS strategy and calls-to-action to replicate its success in the email channel.

Email marketing also has a lower average order value compared to other channels, which may indicate the need to promote higher-priced products to our email list.

Paid social is underperforming in terms of revenue per visitor, average session duration, and average order value. We should explore ways to increase AOV and improve product education to make this channel more profitable.

Key Takeaways | Technical Analysis

1. Users who entered through the homepage had the highest final conversion rate -73% higher than those who started their sessions on collection or product pages
2. The drop-off for users who enter through the homepage is collection pages with 24% proceed to the product
3. When analyzing users who entered through the collection pages, we observed a significant drop-off between the product page and the cart
4. For users who entered through product pages, we observed a decrease in add-to-cart rate by 76%
5. Improving the product page experience is essential not only for this entry point but also for strengthening other user journeys across the funnel
6. When segmenting by device, we noticed a very high drop-off rate on the product page for both desktop and mobile
7. We can focus on improving the homepage content and initial sections to reduce the bounce rate and increase average session duration, further strengthening the overall funnel
8. Earrings have strong potential to generate more revenue
9. Replicate SMS performance in email marketing and promote higher-value products

HOW CAN WE NOMINAL BETTER

Clickmap & Scroll Map Analysis

WeConvert
CRO/AGENCY

HP-Areas of HIGH interactivity

1. 21.94% of clicks occur in the navigation bar, making it the most clickable section on the homepage.
2. 8.73% of visitors click within the hero section
3. 0.21% of clicks happen in the benefits section, indicating some attention to value propositions.
4. 19.78% of all clicks are on collection cards, with Necklaces and Rings capturing 63.49% of those clicks—highlighting category interest
5. Only 0.65% of clicks are on product cards, suggesting users prefer browsing collections over selecting individual products right away
6. 4.65% of users click on the reviews section, showing strong interest in social proof.

CP-Areas of HIGH interactivity

1. 7.66% of all clicks happen inside view more products button

2. We observed a significant difference in product card CTR performance, with the best-performing card receiving 1.61% of clicks and the lowest only 0.03%. We've created a list ranking the most popular product cards accordingly

   We can reorder the product listing so that cards with higher click-through rates appear first

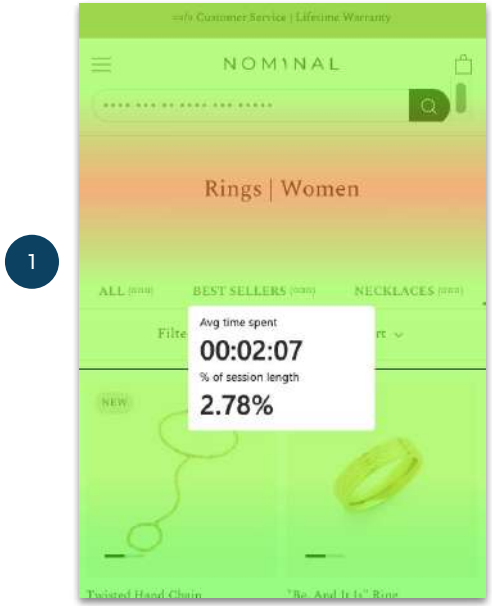
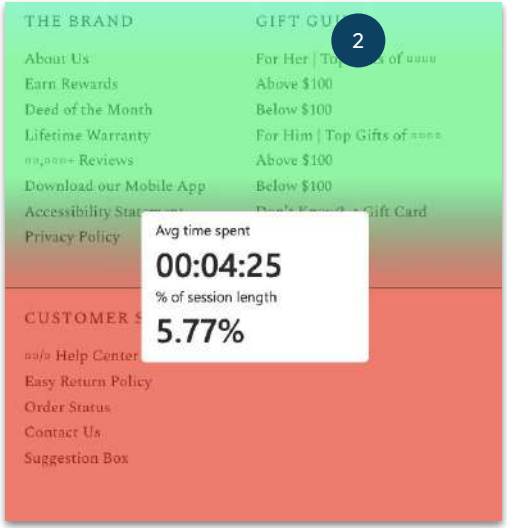
CP-Areas of HIGH interest

1. Above the fold is the second most engaged part of the website, with users spending less than 2 minutes interacting with filters and sorts

2. The pagination area is the highest-engaged section, with users spending more time there and frequently clicking to view additional collection pages and explore more products



Hero section clicks



Change pagination clicks

PP-Areas of HIGH interactivity

1. Clicks on the menu is clicked by 11.49%, indicating user interest in exploring additional products

2. Interaction with upselling options is one of the most clicked features, indicating strong user interest in adding complementary additional upsells

3. We also noticed higher engagement with the Palestine banner and the material & warranty sections, showing that users actively seek more information in these areas

4. Additionally, users click more on the "Perfect Combination" product images than on selectors or the "Add Bundle to Cart" button—indicating that visuals of the pieces play a key role in their purchase decision

Most popular — Least popular

PP - Areas of low interest

1. The benefits section before the accordion is one of the least engaged areas on the page. Users are likely overlooking it due to low contrast, resulting in minimal time spent and low interaction with the banners.

2. The least engaged section is the dedicated benefits area near the bottom of the page, with users spending less than 6 seconds on it and showing low scroll activity.

3. Once again, the "Featured In" section shows extremely low engagement, with users largely ignoring the magazine mentions—even on the product page

Key Takeaways | Heatmap Analysis

1. **High interaction with the menu:** As users move further down the funnel, menu and search interactions increase, showing a strong intent to explore and compare options

2. **Interest in browsing options:** Users engage more with collection cards than product cards, indicating a preference to explore full collections before committing to a specific product. This behavior is also reflected in navigation across multiple pages into collections.

3. **Strong engagement with the reviews section:** Even located lower on the page section

4. **Interest in key benefits:** Users frequently engage with the Palestine donation banner, material details, and warranty information, showing these are important decision factors

5. **Potential in the "Perfectly Paired Pieces" section:** Users show interest in product combinations and spend time here, though they aren't frequently clicking the bundle cart or SKU selectors to proceed. There's opportunity to optimize this section to drive more action

HOW CAN WE MAKE NOMINAL

Usability & Heuristic Analysis

WeConvert
CRO/AGENCY

Our UX Heuristic Guidelines

In our experience, conversion occurs as a result of the influence of **five dimensions**, which, together, answer the fundamental questions users will ask during their buying journey.

VALUE
Is it communicating value to the user? Can we do better? Can we increase user motivation?

RELEVANCY
Does the page meet user expectation – both in terms of content and design? How can it match what they want even more?

CLARITY
Is the content or offer on this page as clear as possible? How can we make it clearer, simpler?

MOTIVATION
Does the content motivate and encourage the user to take action towards the goal?

FRICTION
What on this page is causing doubts, hesitations and uncertainties?

UX Heuristic Total Scores

0-40 40-75 80-100

The scores are based on averages and help us identify where key opportunities are. Although the key areas of opportunity are in value and motivation, it's important to "get the basics right" first.

These scores suggest there's some fundamental issues with **value , motivation** and **trust** which should be addressed first.

VALUE 72%

- Our product and value proposition are not clear within the first 5 seconds
- Users aren't seeing our main differentiators or benefits right away

FRICTION 10%*

- Low contrast between product badges and the product cards
- We don't have product thumbnails or navigation arrows in the product gallery.

We.

UX heuristics

MOTIVATION 56%

- We're not highlighting all the benefits we offer across many pages.
- Improve the upsell section on the product page and the cart page

CLARITY 79%

- We have too many distractions—pop-ups, banners, and some duplicate sections on the homepage

TRUST 57%

- We can include UGC content with videos and animations to generate more trust
- Add dedicated sections to highlight our history and tradition

*In the case of friction the lower score, the better

WeConvert CRO/AGENCY

The lowest score in four dimensions were in the homepage where we will starting our work

Research Dimension	Homepage	Product Page	Benchmarks
Trust	60%	85%	87%
Motivation	53%	60%	81%
Value	68%	76%	83%
Clarity	72%	88%	85%
Friction	10%	6.7%	28%

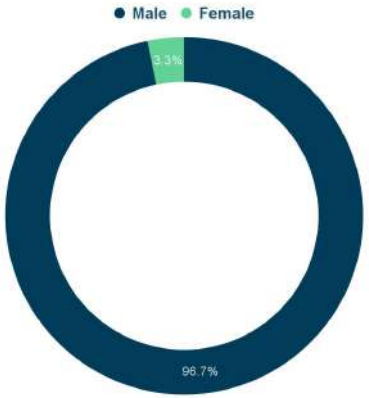
WHAT YOUR CUSTOMERS THINK OF NOMINAL

Post-purchase Survey

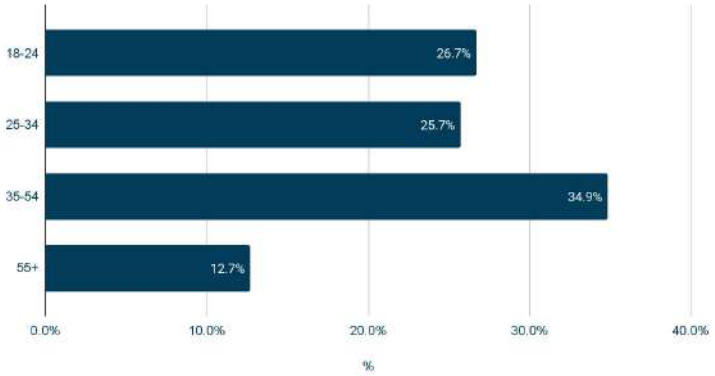
WeConvert
CRO/AGENCY

Our customer profile are men aged between 35 and 54 years old.

What is your gender?



What is your age group?

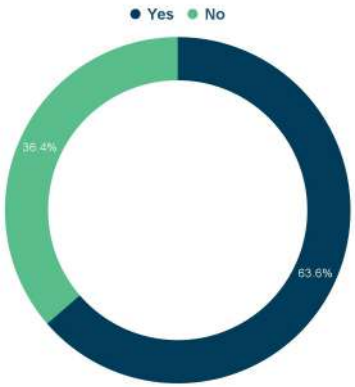


We collected 284 responses in the post-purchase survey using Jotform.

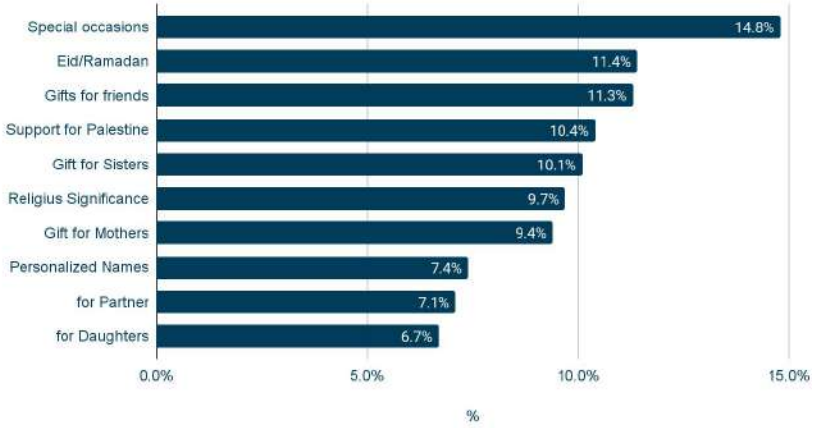
WeConvert
CRO/AGENCY

Almost 40% of users purchase our products thinking to gift someone

Did your order contain a gift for someone today?



Why did you choose it? What makes it meaningful to you/them?

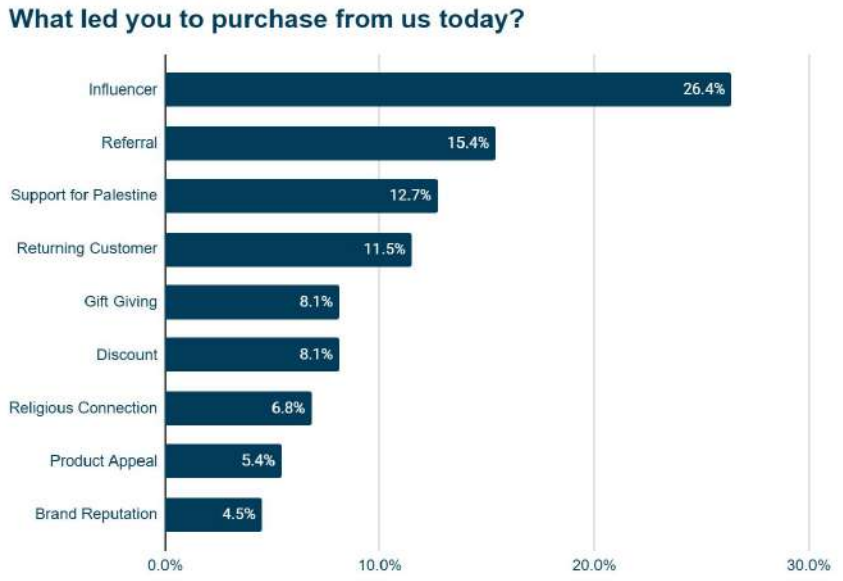


WeConvert
CRO/AGENCY

41% of users are highly influenced by recommendations from other people about our products

Conclusions

- It's interesting to see that 8.1% of users purchased today due to discounts and promotions, while another 8.1% returned because of gifts or special occasions.
- Seasonality is extremely important for us, and we should focus on creating campaigns that align with key marketing cycles to take full advantage.

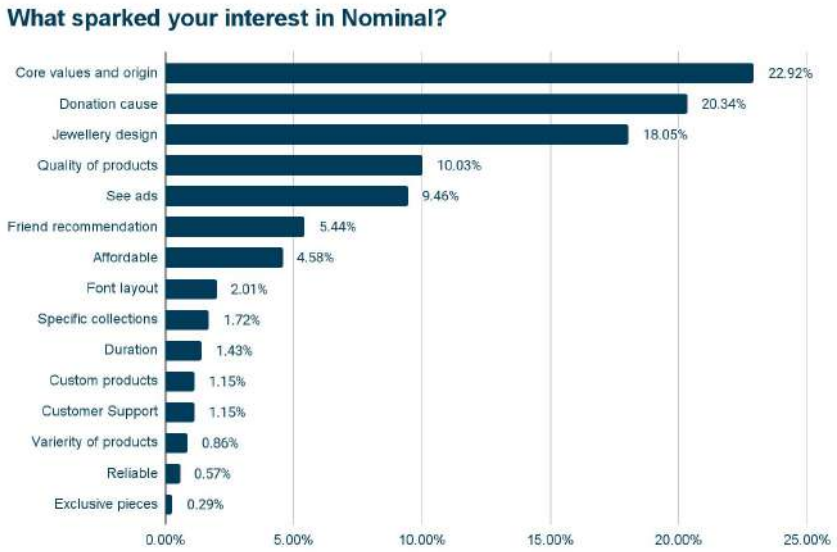


WeConvert
CRO/AGENCY

42% of users showed interest due to our intrinsic values, such as donations and brand origins, while 40% were drawn by our product quality—including design, affordability, and features

Conclusions

- We observed that users are highly engaged with our intrinsic values, which make the brand stand out and feel meaningful.
- People clearly value our product features—especially the design and quality of the jewelry.
- We also saw continued interest driven by recommendations, with nearly 6% of responses mentioning it.

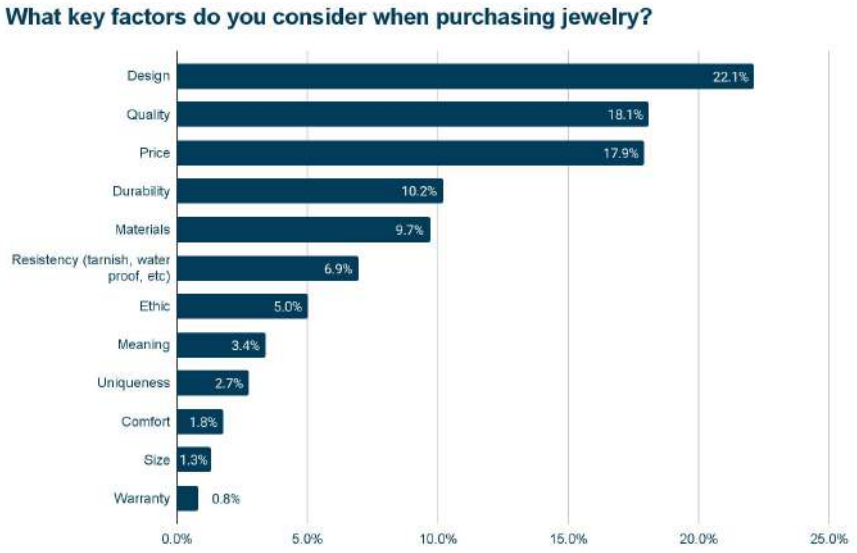


WeConvert
CRO/AGENCY

About product features - users are considering design (22%), quality of jewelry (18%) and price (17%) as main factors to purchase

Conclusions

- Durability—combined with resistance to tarnish, water, and breakage—is another extremely important factor for 17% of users.
- Intrinsic values matter to 8.4% of users, especially ethical values and the meaning behind each piece.
- The overall layout is also highly important to our users, along with the display quality and the use of good materials, as they're looking for pieces meant for long-term use.

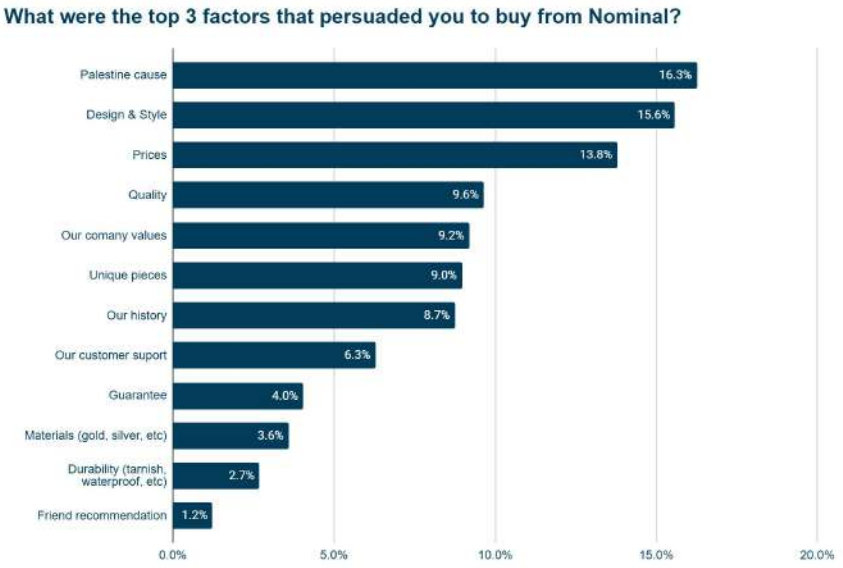


WeConvert
CRO/AGENCY

The Palestine cause is a strong purchase driver, with 16.3% of users mentioning it as an incentive to complete their order

Conclusions

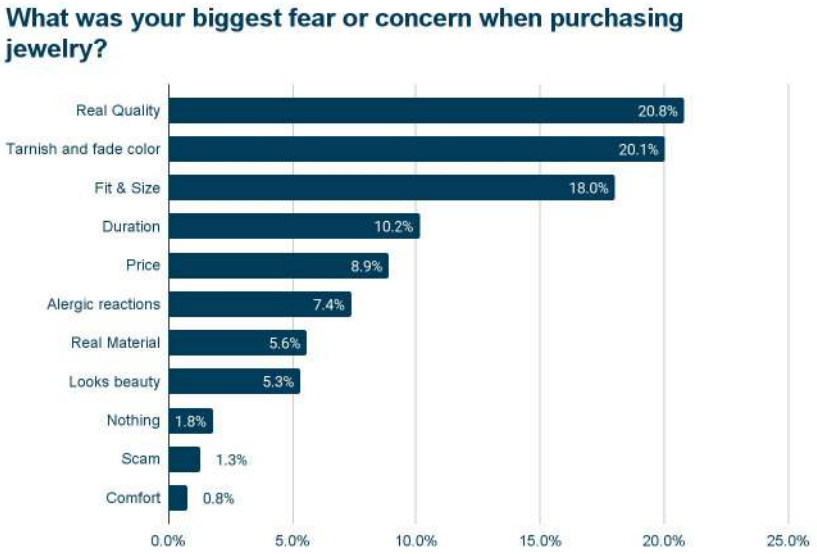
- Style, unique design, and layout persuaded 24.6% of users to make a purchase, highlighting the importance of using high-quality images.
- We also noticed concerns related to quality (9.6%), materials (3.6%), and durability (2.7%), making it essential to reinforce these aspects in product descriptions.



Users are more concerned about the quality of materials (20.8%) than about scams or fake products, indicating strong brand trust. Material details and product durability aren't fully clear (30% of users mentioning)

Conclusions

- Our reputation is solid, and the hesitation seems to come more from uncertainty about choosing the right product than from skepticism about the brand itself.
- Users commonly raised concerns around material quality, durability, and fit & sizing. Additionally, 7.4% of users mentioned worries about allergic reactions.
- It's clear that material quality is a recurring concern, and we need to address this more clearly and consistently throughout the site.

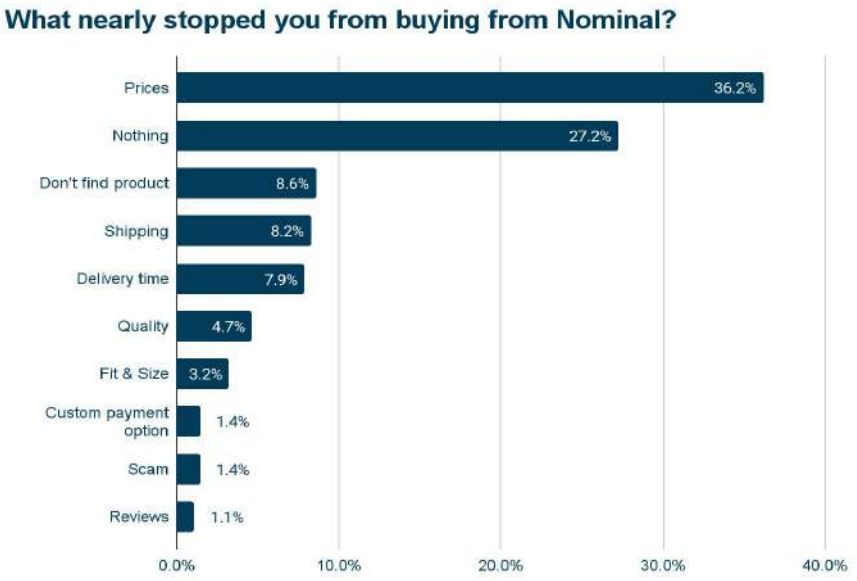


WeConvert
CRO/AGENCY

36.2% of users nearly abandoned their purchase due to pricing, and 16.1% mentioned concerns related to shipping

Conclusions

- Some users also mentioned difficulties in finding the right product (8.6%), likely due to challenges with selecting fit and size (3.2%) and questions about quality (4.7%).
- We need to improve the user experience by helping users find the right product more easily and by clearly displaying information about materials, fit, and sizing.
- Providing clear information is a more cost-effective solution than adjusting shipping policies or prices.

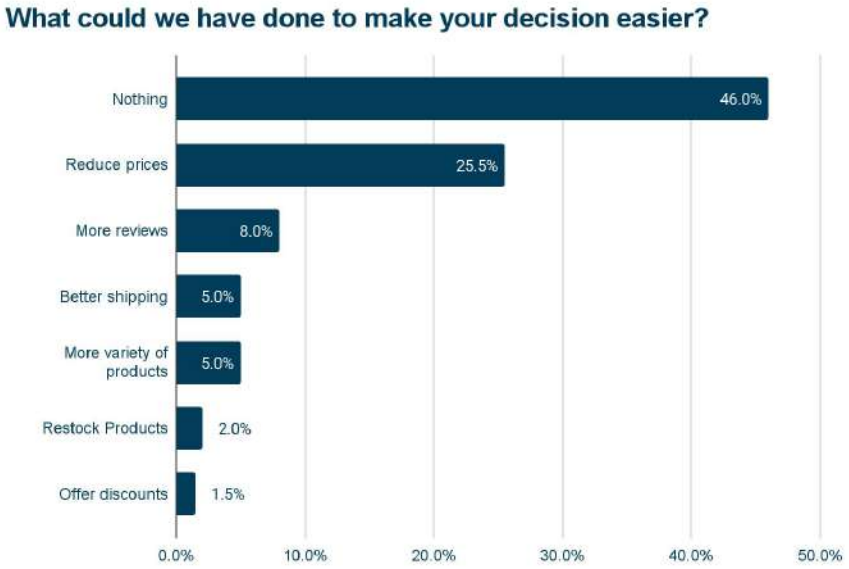


WeConvert
CRO/AGENCY

27% of users believe that reducing pricing would be the main strategy to make purchasing easier, while 8% would like to see more reviews!

Conclusions

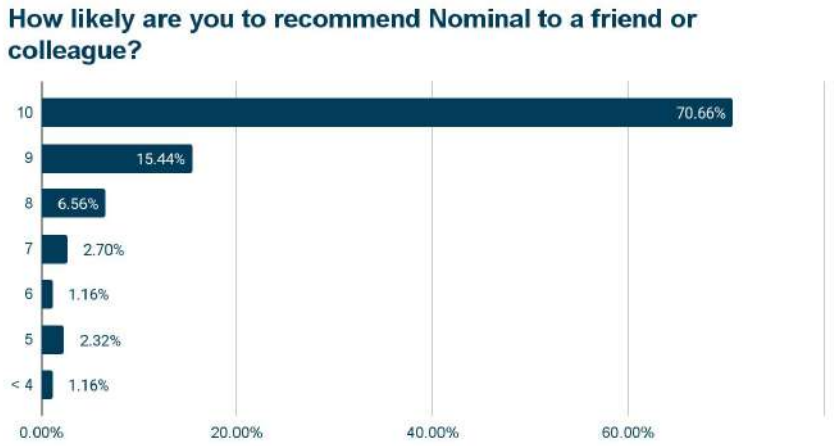
- We also observed several users requesting a wider variety of products (5.3%) or asking for popular items to be restocked (2.1%), highlighting the importance of a strong, well-managed catalog.
- It may be worth considering targeted discounts for new users and optimizing our shipping strategy, such as adjusting the free shipping progress bar, to encourage more conversions.
- Additionally, 8% of users mentioned the need for more visible reviews, which should also be taken into account.



92.66% of users would recommend our products to others, highlighting the strength of our brand and reputation.

Conclusions

- Less than 8% of users gave a score below 7 when asked if they'd recommend us, which confirms high overall satisfaction.
- Considering how influential friend recommendations are in the purchase decision, it makes total sense to create strategies that encourage more referrals.
- We can offer discounts, rewards, points, or other meaningful incentives to motivate users to recommend our products and grow our customer base.



Key Takeaways | Post Purchase Analysis

1. **Gifting is a key use case**: 25% of users purchase for family and 11% for friends, highlighting the importance of gifting-related messaging

2. **Strong influence from others**: 41% of users are driven to buy based on recommendations, showing the power of word-of-mouth and social proof

3. **Top purchase drivers**: The two main reasons users buy are our intrinsic values (donations, brand origin) and product quality (design, materials, price)

4. **Design matters most**: Unique design is the primary deciding factor, reinforcing the need to display high-quality images and offer a wide product variety throughout the site

5. **Main purchase concern**: 30% of users find material authenticity and durability unclear, indicating a need for better communication around product quality

6. **Price and shipping are barriers**: 36.2% of users nearly abandon due to pricing, and 16.1% due to shipping, making these key areas to address for easing purchase decisions.

HOW CAN WE MAKE NOMINAL

User Testing Analysis

~Our offer isn't clear at the beginning of the site, with some people thinking we're selling clothes or that it's only for a restricted audience

What were your first impressions?

- I don't know what product is being sold
- It's not clear what's being sold
- Different types of jewelry are being sold
- Clothing for Muslim people
- It's an e-commerce site
- It's for Muslim people
- I think it's intended for adults
- I think it's intended for religious people, specifically Muslims
- Targeted at Arabic or Muslim audiences
- Very niche marketing

The hero section doesn't clearly display the exact product we're selling.

Some people think we're trying to sell clothes or only religious items at first glance.

Other users got the impression that we're targeting a very restricted market, selling only to Muslim people.

Worth mentioning is that some users were able to recognize that we offer jewelry accessories.

~Users have questions regarding the authenticity of the materials and their composition. They would also like to see more items, learn how our donation program works, and read more about the company's history

Is there anything missing?

- Is this authentic material?
- I'd like to see more items, and especially what they're made of
- I don't know the shipping cost
- How does the donation work?
- Which charity does it support?
- Is it authentic gold?
- Are returns free, or do we have to pay to return an item?
- I'm not seeing any information about the company's history

Regarding the lack of information, users would like to see more details about our material composition, mainly to understand whether the materials are authentic.

Other common questions relate to shipping costs and whether free returns are available.

Users also want clear guidance on how our donation program works and more information about our company history.

The main goal is to better understand our purpose.

~Users reported some issues and bugs on our website, primarily related to confusion in the hero section and the product image gallery not updating when different SKU selectors are chosen

Are there any other issues you would like to tell us ?

- Hero section is too long to understand
- I didn't realize it was a women's jewelry collection based on the hero section
- Confused about the numbers on the collection pages (e.g., the numbers in brackets near the size)
- It's not clear if the product image changes when I select a different color using the SKU selector

Users are having trouble understanding the hero section.

They also pointed out that it doesn't clearly communicate that we're selling a women's jewelry collection just from the initial view of the website.

One user mentioned confusion about the numbers on the left side of the collection pages, not understanding what they represent.

However, the main UX issue reported was that the main product image in the gallery doesn't change when users select a different color or material.

~Provide clearer and more detailed information about the materials used, our charity initiatives, the history of the company, and how to distinguish products that are designed without specific religious symbolism

What we can do to improve?

- Provide more information about materials
- Remove or delay pop-up banners
- Add more details about the company and its charity work
- Add a small tagline under "Nominal" so users understand the site's target audience
- Include the name and description of the charity
- Add more swatch images

Users summarized several ways we can improve by providing more information.

We should add more visible and detailed information about the quality and source of our materials.

In particular, we need to explain our donation program more clearly—highlighting which institution is behind it, relevant details, and evidence of the impact we're making.

Information about our company history and values. While this content exists on our current site, it's not easily noticeable to users.

Removing distracting banners and adding more swatch images could also enhance the user experience.

Additionally, some users suggested adding badges to products to indicate which ones have religious meanings and which do not.

Key Takeaways | User Testing Analysis

- Our offer isn't clear at the beginning of the site, with some people thinking we're selling clothes or that it's only for a restricted audience
- Users pay more attention to intrusive and fast-appearing pop-up banners, reviews, social proof, and best-selling collections
- Users have questions regarding the authenticity of the materials and their composition. They would also like to see more items, learn how our donation program works, and read more about the company's history
- Users are concerned about material authenticity, the meaning behind the products, and selecting the correct SKU, particularly regarding language and size options
- Provide clearer and more detailed information about the materials used, our charity initiatives, the history of the company, and how to distinguish products that are designed without specific religious symbolism

What are other competitors doing differently from Nominal?

Competitor Insights

We benchmarked Nominal website to brands that are targeting similar audiences

Competitors:

- Mejuri
- Gorjana
- Ananda Soul
- Zudo

Categories compared:

- Friction & UX
- Display benefits and incentives
- Credibility
- Increase AOV Strategies
- Others

MEJURI

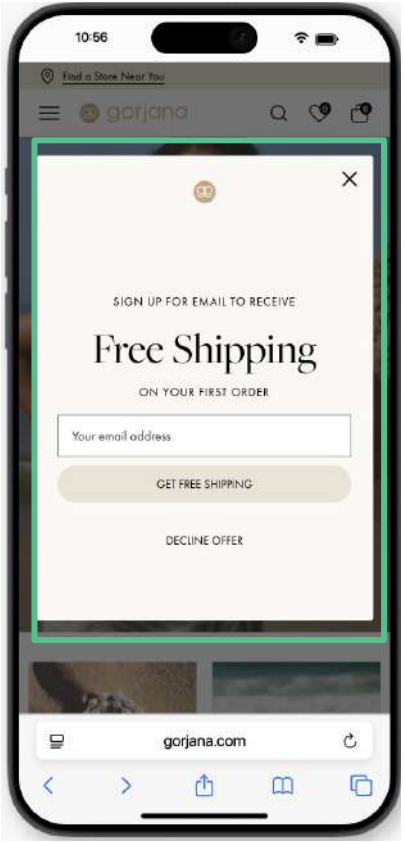
gorjana

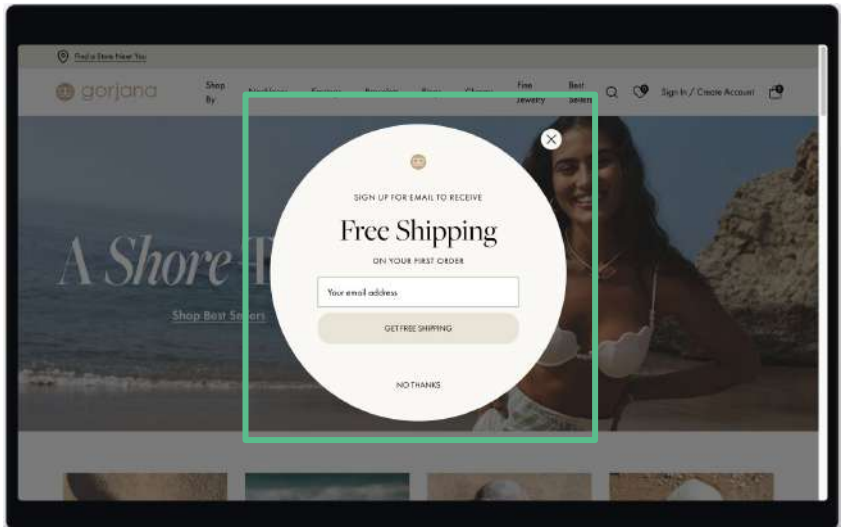
ANANDA Soul

ZUDO

Friction & UX

- **Less distracting pop-up banner with a clear close button (Include a clear close button and a click-off area to help users easily dismiss pop-up modals if they're not interested)**
- More filtering options, including material, availability, stone type, etc.
- Limit the number of products displayed per page
- Filter buttons within the review section

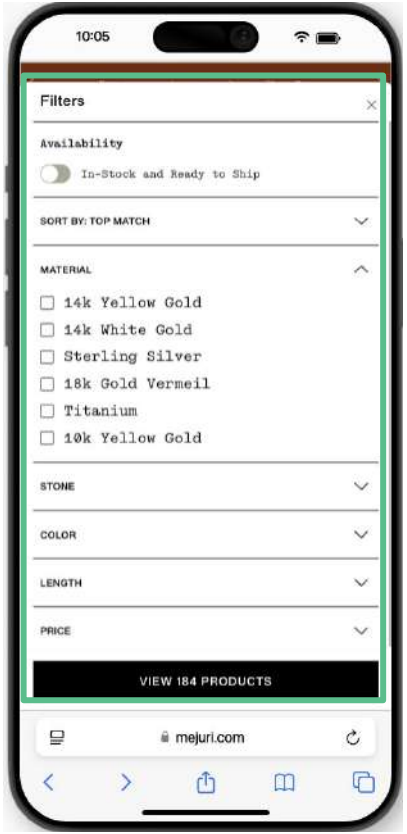




Source: Expert heuristic analysis

Friction & UX

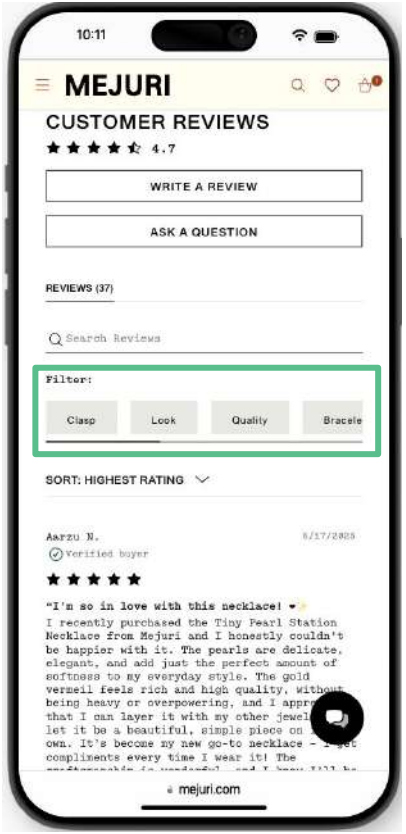
- Less distracting pop-up banner with a clear close button
- **More filtering options, including material, availability, stone type, etc (More filters help users navigate the wide variety of products by narrowing down to their desired options)**
- Filter buttons within the review section



Source: Expert heuristic analysis

Friction & UX

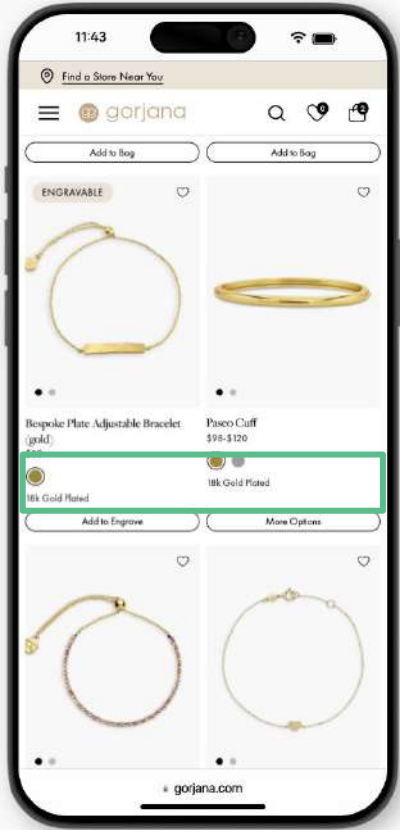
- Less distracting pop-up banner with a clear close button
- More filtering options, including material, availability, stone type, etc.
- **Filter buttons within the review section (These buttons represent perspectives on the reviews, helping users visualize key product characteristics and filter a large number of comments based on the desired angle)**



Source: Expert heuristic analysis

Display benefits and incentives

- **Add product material information below product cards (Considering the importance of understanding product materials before navigating into each product, Gorjana includes this information directly on the product cards)**
- Dedicated sections to highlight key benefits



Source: Expert heuristic analysis

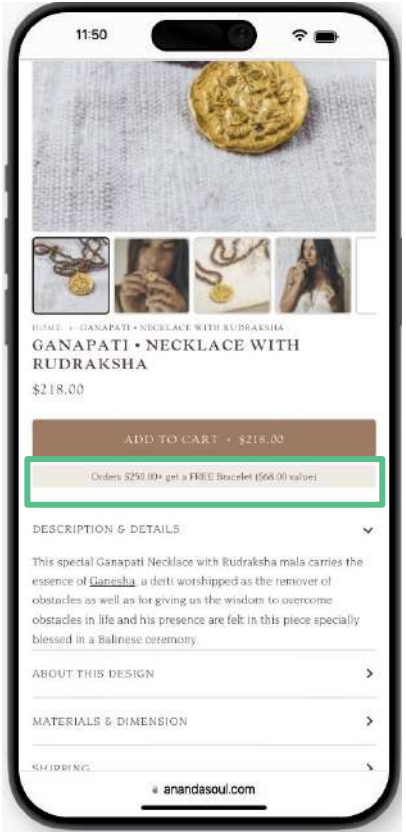
Display benefits and incentives

- Add product material information below product cards
- **Dedicated sections to highlight key benefits (More sections highlighting the benefits help users remember why buying here is better than from competitors, increasing perceived value)**

Source: Expert heuristic analysis

Display benefits and incentives

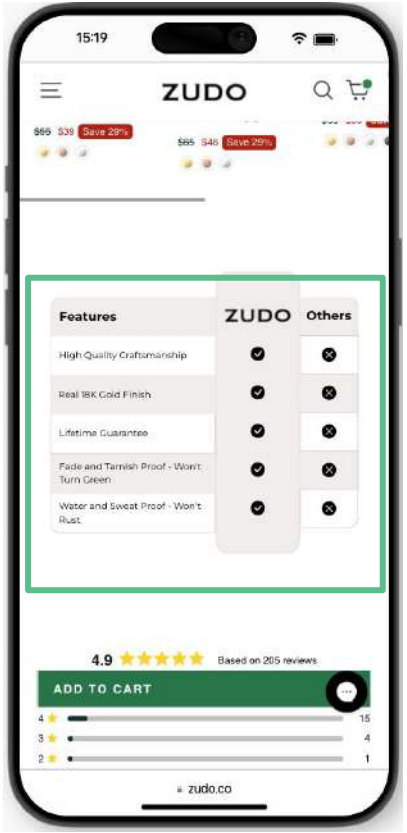
- **Clear incentive banner near the add-to-cart CTA to encourage buying more products (Displaying price or other incentives near CTAs helps users decide faster and usually grabs more attention)**
- Include a comparison table with other regular jewelry brands



Source: Expert heuristic analysis

Display benefits and incentives

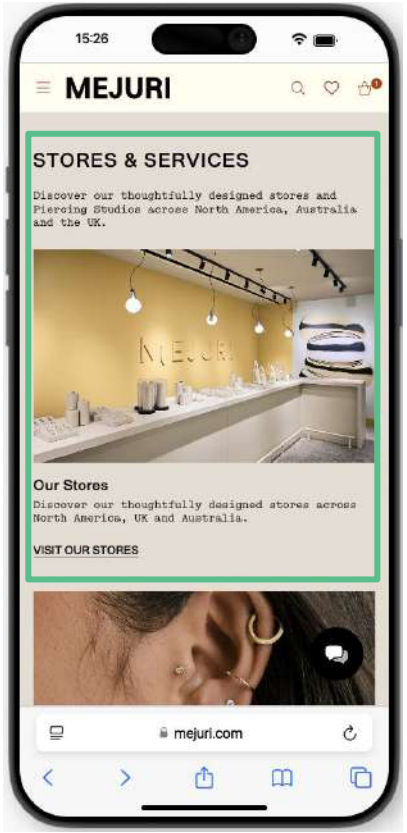
- Clear incentive banner near the add-to-cart CTA to encourage buying more products
- **Include a comparison table with other regular jewelry brands (This is a clear and direct way to highlight our benefits and justify what makes our product different from others)**



Source: Expert heuristic analysis

Credibility

- **Images showcasing physical stores (Adding real images of physical stores greatly boosts credibility and makes the brand feel more authentic—especially since these stores often appear upscale, which enhances the perceived value)**
- Certifications proving social impact



Source: Expert heuristic analysis

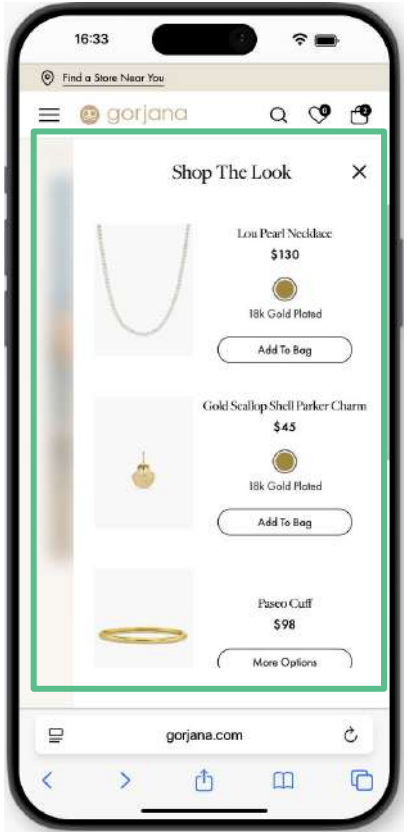
Credibility

- Certifications proving social impact (Certifications showcasing awards, social impact, or other key achievements help users trust the brand more)

Source: Expert heuristic analysis

Increase AOV Strategies

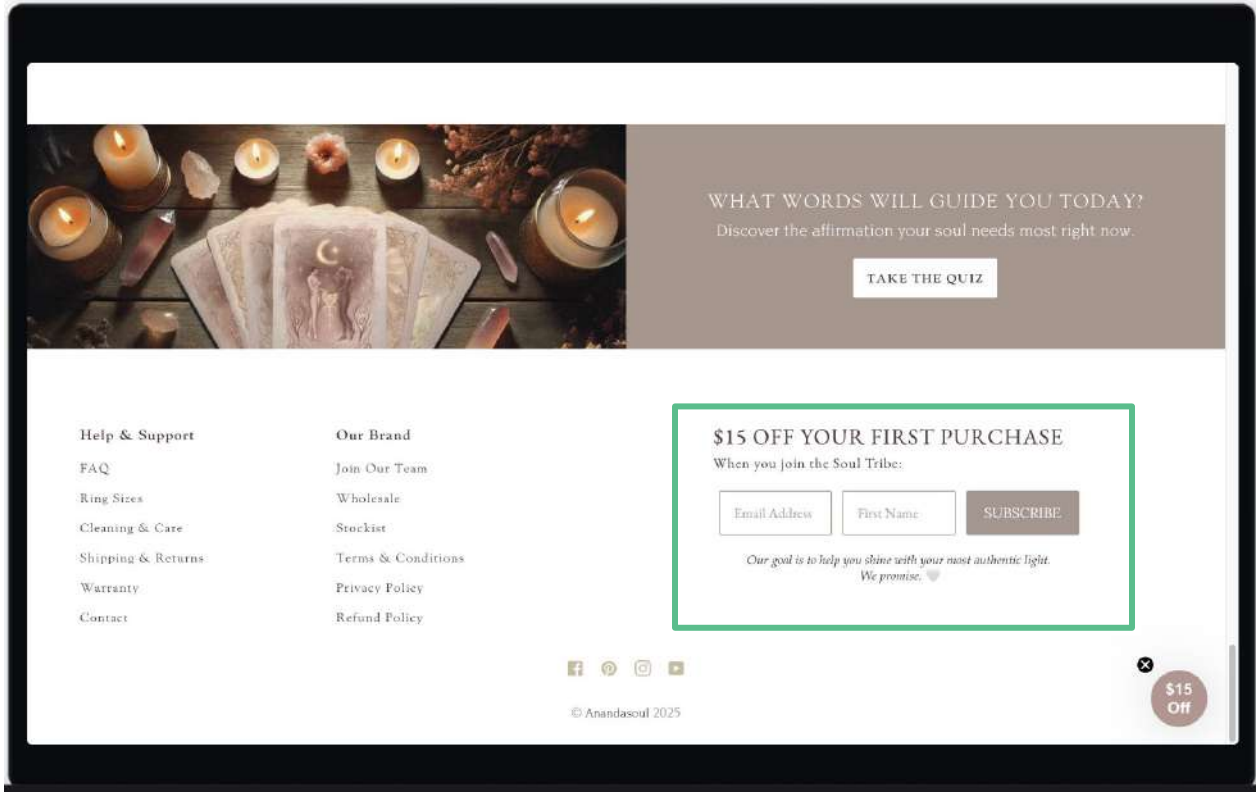
- Include a "Shop the Look" feature to facilitate upselling (Instead of displaying separate products, we can show combined items worn by a model, allowing users to add all of them to the cart with one click)



Source: Expert heuristic analysis

Others

- **Lead magnet at the bottom of the page (For users who scroll to the bottom of the page without deciding to buy, displaying a lead magnet to capture their email and retarget them later could be an effective strategy)**
- Quiz page to help users find the best custom product



Source: Expert heuristic analysis

Others

- Lead magnet at the bottom of the page
- **Quiz page to help users find the best custom product (That's an alternative funnel strategy to help users filter a large variety of products by entering personal information—generating leads and creating a more personalized experience)**

MAKING INSIGHTS ACTIONABLE

Putting in all together

WeConvert
CRO AGENCY

Theme 1

Problem statement: Improve the clarity and layout of the website to enhance the overall user experience

Context:

- Several pages on the website feature simplistic hero sections that lack benefits, relevant information, and clear CTAs.
- Many key areas—such as upselling sections, hero banners, reviews, benefit highlights, and other dedicated sections—have a confusing and outdated layout.
- Organizing content and improving the layout can help users quickly understand our differentiators and clarify

Top strategic recommendations:

- Test: (Collection Page) Redesign the hero section reducing blank space and high-contrast filter buttons
- Test: (Product Page) Add a sticky CTA button
- Test: (Home Page) Redesign the hero section to include benefits, social proof, and featured in section
- Test: (Product Page) Add image thumbnails below the main product gallery image instead of dots

Theme 2

Problem statement: We're not fully leveraging the available information about our products, donation program, brand history, and other key details

Context:

- Many users aren't seeing all the valuable information available on the website. Key details—such as how our donation program works, the materials we use, and our brand story—are not clearly presented, limiting their persuasive power.
- We can improve how this content is displayed to better communicate our benefits, build trust, and engage the community.
- Considering the many persuasive assets we have, the current site does not present them clearly or visibly enough. Making this information more accessible and prominent would help users see greater value in our brand.

Top strategic recommendations:

- Test: (Product Page) Redesign the Palestine donation banner to include more information
- Test: (Product Page & Home Page) Create a dedicated section about the donation program
- Test: (Product Page) Add some FAQs to the mini accordion section
- Test: (Product Page & Home Page) Create a UGC section showing real people using the product with more images

Theme 3

Problem statement: The website offers a large variety of products, but it’s difficult for users to quickly find the right ones

Context:

- We offer thousands of products, which can naturally lead to choice overload and decision fatigue
- Combined with the current lack of features to help users filter, preview, and sort products efficiently, the selection process becomes more complex
- Users laos prefer to browse and explore products before visiting individual product pages.

Top strategic recommendations:

- Test: (Collection Page) Add arrows and CTAs below each product card
- Test: (Collection Page) Add category buttons with logos instead of just hyperlinks
- Test: (Collection Page) Reorder the product cards based on click performance
- Test: (Collection Page) Add product material information below product cards

Theme 4

Problem statement: Boost revenue and value proposition at strategic points

Context:

- We’re not fully leveraging upselling strategies on product and cart pages.
- Some upsell sections have a poor, confusing layout and don’t present enough options to help users combine products effectively
- This, combined with a low AOV in certain categories, highlights an opportunity to implement clearer, more strategic upselling to increase order value.

Top "tactical" recommendations:

- Test: (Cart) Add more product upselling options in the cart
- Test: (Product Page) Redesign the Perfectly Paired Pieces upsell section
- Test: (Cart) Redesign the upselling section with better contrast, design hierarchy, and clear CTAs
- Test: (Cart) Add extra upselling options instead of just products

Classifying insights by the testing themes discovered during the research

TESTING THEME 1

Improve the clarity and layout of the website

TESTING THEME 2

Add more detailed information about our history, values and product

TESTING THEME 3

Enhance product findability to help users quickly choose the right item

TESTING THEME 4

Create additional revenue boosters at strategic conversion points

Testing bucket 1: Improve the clarity and layout of the website

Test idea	Priority
1. (Collection Page) Redesign the hero section reducing blank space and high-contrast filter buttons	High
2. (Home Page) Redesign the hero section to include benefits, social proof, and featured in section	High
3. (Product Page) Add a sticky CTA button	High
4. (Product Page) Add image thumbnails below the main product gallery image instead of dots	High
5. (Home Page) Redesign reviews section	Medium
6. (Product Page) Redesign the selectors to occupy less space and have a more contrasted layout	Medium
7. (Product Page) Redesign the benefits buttons before the mini accordion	Medium
8. (Cart) Allow users to edit SKU variations in the cart	Low

Testing bucket 2: We're not fully leveraging the available information

	Test idea	Priority
1.	(Product Page) Redesign the Palestine donation banner to include more information	High
2.	(Product Page) Add some FAQs to the mini accordion section	High
3.	(Product Page) Create a UGC section showing real people using the product with more images	High
4.	(Product Page & Home Page) Create a dedicated section about the donation program	High
5.	(Product Page) Add urgency signs (e.g., low stock or exclusive product badges)	Medium
6.	(Product Page & Home Page) Create a dedicated section about our history and values	Medium
7.	(Home Page) Add an FAQ section	Medium
8.	(Collection Page)Add product material information below product cards	Medium
9.	(Product Page & Home Page) Add a section showing our physical store and real people working	Medium
10.	(Product Page) Create a product comparison table	Low
11.	(Product Page & Home Page) Add a section featuring external YouTube reviews	Low
12.	(Checkout) Add contact information during the checkout process	Low
13.	(Product Page) Add visible payment logo options	Low

Testing bucket 3: Improve the findability and help users select products

	Test idea	Priority
1.	(Collection Page) Add arrows and CTAs below each product card	High
2.	(Collection Page) Add category buttons with logos instead of just hyperlinks	High
3.	(Collection Page) Reorder the product cards based on click performance	High
4.	(Collection Page) Add product material information below product cards	High
5.	(Product Page) Add shortcut buttons at the top to help users navigate the page	Medium
6.	(Collection Page) Create a "quick view" feature on product cards	Medium
7.	(Collection Page) Add more filtering options	Medium
8.	(Collection Page & Home Page) Redesign the badges to have stronger contrast	Medium
9.	(Collection Page & Home Page) Use distinct badges to reinforce product features	Low
10.	(Others) Create a quiz funnel to suggest products for users	Low

Testing bucket 4: Boost revenue and value proposition at strategic points

Test idea	Priority
1. (Cart) Add more product upselling options in the cart	High
2. (Product Page) Redesign the Perfectly Paired Pieces upsell section	High
3. (Cart) Redesign the upselling section with better contrast, design hierarchy, and clear CTAs	High
4. (Cart) Add extra upselling options instead of just products	Medium
5. (Product Page) Add bundle buttons instead of a numeric selector	Medium
6. (Product Page) Include a “Shop the Look” option in the product page	Medium
7. (Cart) Add up-selling products in the checkout	Medium

Journey Ahead

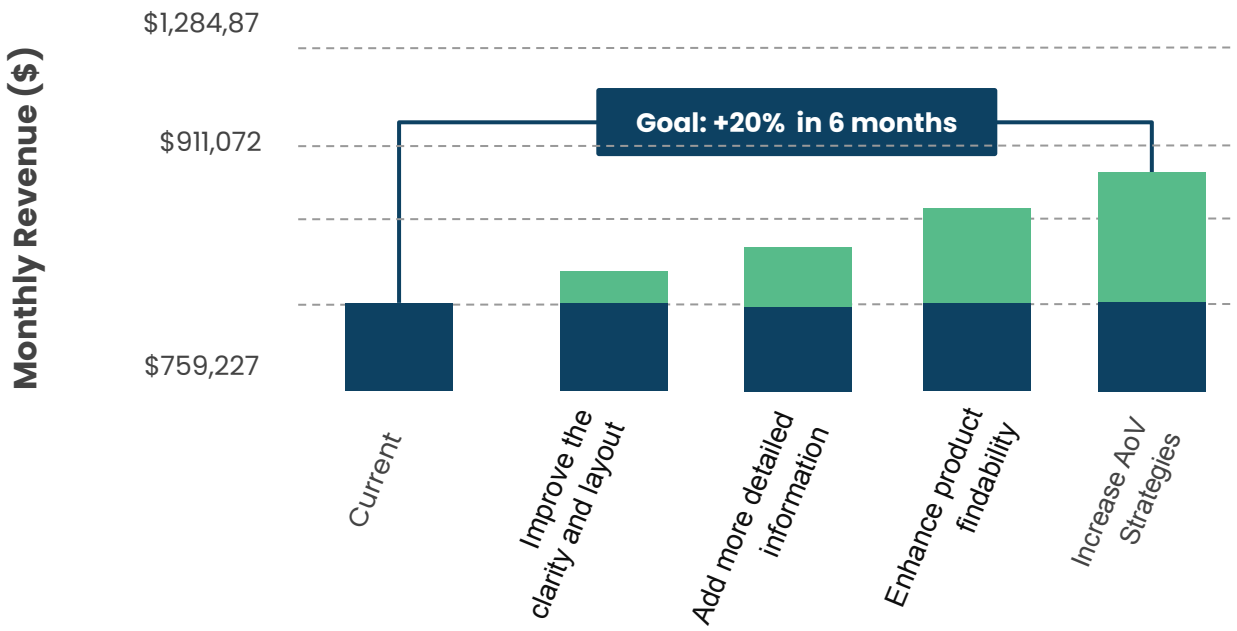
WeConvert
CRO AGENCY

By fixing JDIs and running 3 tests per month testing on outlined themes our goal is to :

- +20% INCREASE IN YOUR CONVERSION RATES IN NEXT 6 MONTHS
- IMPROVE EMOTIONAL RESONANCE CONNECTED WITH YOUR BRAND
- INCREASE USER TRUST AND BOOST CREDIBILITY
- A CLEAR ROADMAP FOR CONTINUOUS TESTING AND GROWTH

Focusing on high-impact, easy-to-implement tests first can significantly boost the Nominal's top-line performance.

This will enable you to achieve a significant impact* on your bottom-line



*this is just rough estimation based on previous experience with other clients

NMN-PP-AB01- Create a sticky CTA button

Issue: Users cannot see the add-to-cart button while scrolling, which distracts them and prevents them from converting

Test: A good practice is to make the add-to-cart button sticky, so when users scroll down the page, the button follows them.

This will happen because users will see the Add-to-Cart button at all times during their journey, reducing friction.

Goal 1: **Transactions** GA4

	Visitors	Conversions	Conversion Rate	Improvement	Confidence	Significant
Original	10,113	214	2.12%	-	-	-
Variation 1	9,936	207	2.08%	-1.55%	56.4%	No
Variation 2	9,032	227	2.51%	18.61%	86.6%	No

No statistically significant differences were found.
Please continue testing to ensure a sufficient sample size.

Goal 2: **add_to_cart** GA4

	Visitors	Event Count	Conversion Rate	Improvement	Confidence	Significant
Original	10,113	2,628	25.99%	-	-	-
Variation 1	9,936	2,604	26.21%	0.85%	63.9%	No
Variation 2	9,032	2649	29.33%	12.87%	99.9%	Yes

NMN-CART-AB02 - Add chain extender and gift box as up-sell

Issue: Users are interacting less with the current upsell option, likely due to the dull layout and low upselling conversion rate.

This is happening because we're offering only a few options presented in a confusing design.

Test: Offer complementary low-value upselling options that capture users' attention and are easy to add to the current cart.

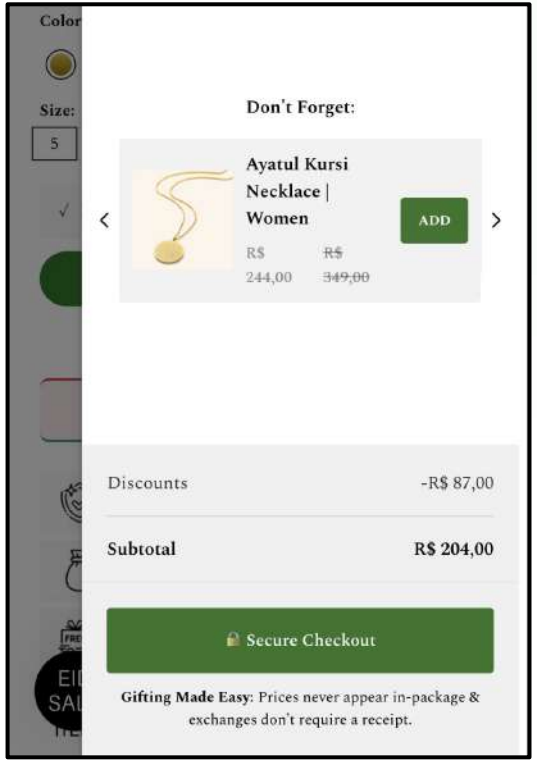
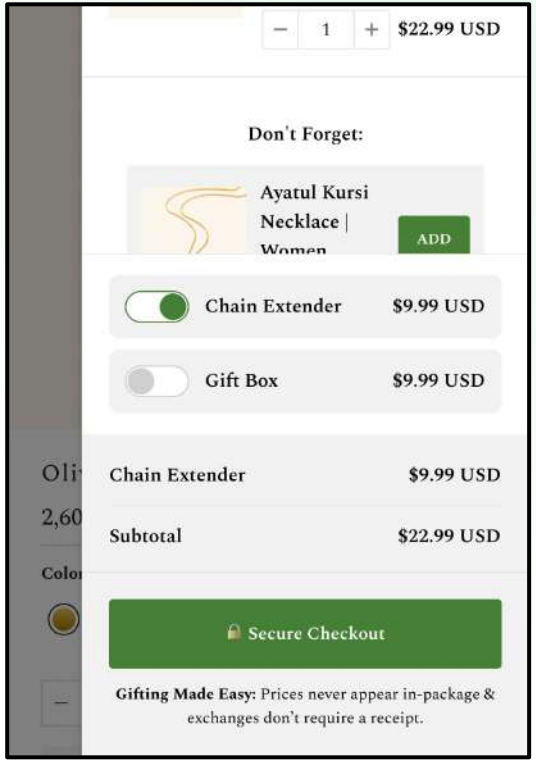
- User Testing



ORIGINAL



CHALLENGER

NMN-CP-AB03 - Add secondary filters buttons

Issue: We have limited filter options, and users are spending a lot of time scrolling and trying to find products among the large number displayed on the collection pages.

Test: We can add sub-filter buttons based on the user's purpose for finding jewelry, which will narrow down the options and make the search more efficient.

Instead of displaying 40 products per page, we will show only 20 more curated and relevant products.

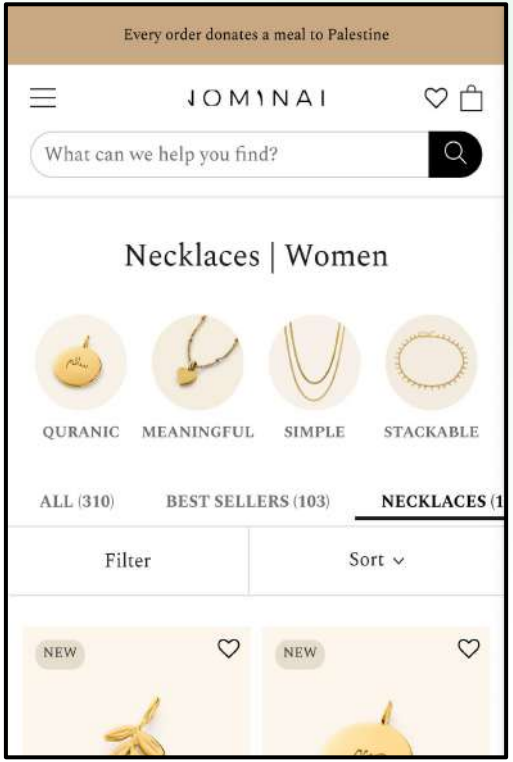
ORIGINAL



CHALLENGER

NMN-HP-AB04 - Redesign the hero section

Issue: The current hero section isn't clear for some users. It doesn't highlight what makes us different, lacks social proof, a strong unique selling proposition, and sufficient contrast to guide users to take action.

Test: We can redesign the hero section to create a more contrasted layout with a clear and impactful headline, visible social proof from the beginning, and stronger emphasis on benefits to help users fully understand our value.
